## 1 Introduction to the Youngsters

Hey, my name is Rob and I am 21 years old. I love to play baseball and hangout with my friends. Other than that, I like to read books, especially Harry Potter. My favorite book in the series is the last one, Harry Potter and the Deathly Hallows. One of my favorite foods to eat is ice cream, especially on a nice warm summer day. Lastly, during the winter I like to snowboard.

## 2 Introduction

I am an ambitious Senior student studying computer science at DePauw University. Experienced in writing code in java, Scala, and C++ programming languages, with aspirations to work in Health Informatics. My strong leadership and communication skills enables me to work well with a team, and also by myself.

A picture of Rob and Chad is shown in Figure 2
