

# Gabrielle Cantor Bio

IU ProHealth REU

Summer 2017

## 1 Professional Bio

Gabrielle Cantor is a rising sophomore at Indiana University majoring in Intelligent Systems Engineering with a minor in Urban Planning and Community Development. She is passionate about using technology to improve daily life, and her research interests lie in robotics, wearable technology, and autonomous development. Gabrielle was inspired to pursue a STEM career after reading Rachel Swaby's book Headstrong: 52 Women Who Changed Science - and the World [2].

## 1.2 Experience

In Table 2, you can find Gabrielle’s relevant work and research experience.

Experience	Dates
ProHealth REU	Summer 2017
REDLab Makerspace Monitor	2017-Present
IU Bicentennial Intern	2017-Present

Table 2: Gabrielle Cantor’s relevant work experience.

## 2 K-12 Bio

Hi! My name’s Gabrielle, and I’m a sophomore studying Intelligent Systems Engineering at Indiana University! I’m from Denver, Colorado, so I love skiing and hiking. I also love experimenting with technology, especially playing with robots - I first used them on my middle school Robotics Team and have been playing with them since then. My favorite books are the Harry Potter series, and my personal favorite is the 7th book - Harry Potter and the Deathly Hallows[1].
